

REQUEST FOR PROPOSAL

For Appointment of Design Consultant for the 41,694 sq. ft. Prototyping, Testing and Technology Innovation Facility

at 6th Floor, Mayuri Tech Park, Mangalagiri, Guntur District, Andhra Pradesh

Particular	Details
RFP Issuing Authority	Ratan Tata Innovation Hub Amaravati Foundation (RTIH)
RFP Reference No.	RTIH/AMVT/RFP/2026/003
Date of Issue	01 Jul 2026
Nature of Assignment	Design Consultancy
Project Location	6th Floor, Mayuri Tech Park, Mangalagiri, Guntur District, Andhra Pradesh
Total Area	41,694 sq. ft.
Interior Works Budget Cap	INR 4 Crore for interior implementation works; design consultancy fee is included
Bid System	Two-cover system: Technical Proposal and Financial Proposal
Evaluation Method	QCBS: Technical 90 marks + Financial 10 marks
NDA	Mandatory prior to release of detailed CAD drawings, equipment list and site-specific documents

This RFP is intended for appointment of a design consultant. Civil/interior execution, equipment supply, commissioning and project management consultancy are outside the scope of this RFP and may be procured separately by RTIH.

1. Notice Inviting Proposal

Ratan Tata Innovation Hub Amaravati Foundation (RTIH) invites proposals from eligible and experienced design consulting firms for appointment as Design Consultant for a proposed Prototyping, Testing and Technology Innovation Facility spread across 41,694 sq. ft. on the 6th floor of Mayuri Tech Park, Mangalagiri, Guntur District, Andhra Pradesh.

The proposed facility is envisaged as a multi-functional innovation infrastructure supporting prototyping, testing, startup innovation, Industry 4.0, AI and data science, robotics and automation, electronics and embedded systems, additive manufacturing, drones and autonomous systems, AR/VR/XR, product engineering, training and collaboration.

This RFP is limited to design consultancy. RTIH will separately undertake the procurement of interior works, civil/MEP execution, equipment supply and commissioning as required. Project management and day-to-day implementation supervision shall be handled internally by RTIH, with technical clarification support from the selected design consultant as specified in this RFP.

2. Background and Project Context

RTIH has been established as a State-level institutional platform to strengthen the innovation and entrepreneurship ecosystem of Andhra Pradesh. The Hub is intended to support startups, MSMEs, students, innovators, industry partners, academia and government stakeholders through shared infrastructure, structured programs, partnerships, incubation, mentoring and technology development support.

RTIH proposes to develop a world-class innovation and technology facility within its premises at Mayuri Tech Park. The facility is intended to provide access to design, prototyping, testing, validation, AI and digital technology infrastructure, immersive demonstrations, startup workspaces and training spaces. The facility must be planned to support both immediate implementation and future expansion.

The design consultant shall use the requirement note, floor CAD drawings, broad equipment list and background documents supplied by RTIH as input documents. The consultant shall validate, rationalize and translate these inputs into a technically feasible, safe, cost-conscious and tender-ready design package.

3. Purpose of the Assignment

The purpose of this assignment is to appoint a design consultant to prepare the complete design, technical planning and tender-ready documentation for the proposed 41,694 sq. ft. facility. The consultant shall balance functionality, safety, cost, user experience, expandability and operational feasibility.

- Prepare a master layout and functional zoning plan for the full floor area.
- Recommend approximate space allocation in a 3:1 manner between prototyping/testing/innovation infrastructure and AI/technology-related areas, subject to functional optimization.
- Design an integrated yet modular facility that can support multiple user types, including startups, MSMEs, students, innovators, researchers, industry visitors and training cohorts.
- Place and validate equipment based on RTIH's broad equipment list, with recommendations for additions, deletions, substitutions, phasing and feasibility on the 6th floor.
- Prepare coordinated architectural, interior, MEP, fire safety, ICT, AV, BMS and structural load-related design inputs.

- Prepare BOQ, specifications and tender-ready documents for a subsequent build/interior works RFP.
- Ensure that the proposed design can be executed within the indicated interior works budget cap of INR 4 Crore, or clearly identify phasing options where all desired features cannot be accommodated within that cap.

4. Project Site and Design Constraints

Parameter	Requirement / Information
Site	6th Floor, Mayuri Tech Park, Mangalagiri, Guntur District, Andhra Pradesh
Area	41,694 sq. ft.
Input Drawings	CAD drawings of the 6th floor will be provided to eligible bidders after execution of NDA.
Indicative Equipment List	Broad equipment list will be provided to eligible bidders. The list is open to technical validation and rationalization by the selected consultant.
Interior Works Budget Cap	INR 4 Crore for interior implementation works. The selected consultant shall design with this implementation cap in mind.
Design Consultancy Fee	To be quoted separately as a lump-sum professional fee.
Execution / Build	Not part of this RFP. To be procured separately.
PMC	Not part of this RFP. RTIH internal team shall handle project management.

Since the facility is proposed on the 6th floor, the consultant shall pay special attention to structural load capacity, vibration, equipment movement, access routes, material handling, floor loading, utility routing, exhaust, dust/fume extraction, HVAC requirements, fire safety, emergency evacuation and operational risks. Any proposed placement of heavy machinery shall be supported by a structural feasibility note and shall be subject to RTIH approval and building owner/statutory approvals as applicable.

Where any equipment or function is found unsuitable for the 6th floor, the consultant shall recommend alternatives such as lighter substitutes, phased procurement, outsourcing linkages, relocation of heavy functions, or revised lab configurations.

5. Indicative Functional Requirements

The following functional requirements are indicative and shall be optimized by the selected consultant. The consultant may recommend modifications based on actual floor geometry, structural feasibility, safety norms, operating model, user capacity, equipment list and budget. The total area to be planned is 41,694 sq. ft.

Zone	Indicative Area / Capacity	Functional Intent
AI and Emerging Technology Zone	Approx. 10,000 sq. ft.; 100-150 users	Hot desks, fixed workstations, startup pods, AI sandbox, AI model training readiness, edge AI deployment readiness, training and collaboration.
Experience Centre	Approx. 5,000-6,000 sq. ft.; 100+ visitors	Interactive technology wall, 8m LED video wall provision, startup gallery, innovation showcase, AP innovation story, investor presentation zone, AR/VR/MR and digital twin demonstrations.

Zone	Indicative Area / Capacity	Functional Intent
Advanced Prototyping Lab	Approx. 10,000-11,000 sq. ft.	Digital fabrication, industrial FDM/SLA/SLS printer readiness, laser cutters, CNC machines, mechanical workshop, electronics lab and robotics zone.
Makerspace	Approx. 6,000-7,000 sq. ft.; 75-100 users	Open workbenches, modular furniture, rapid prototyping tools, IoT stations and electronics tinkering area.
Testing and Validation Labs	Approx. 4,000-5,000 sq. ft.	Robotics testing arena, drone testing cage, product testing, environmental testing, functional validation, AR/VR lab and motion tracking readiness.
Training and Collaboration Spaces	Approx. 2,000-3,000 sq. ft.	Training rooms, workshops, seminars, hybrid events, faculty/mentor sessions and structured program delivery.
Reception and Visitor Management	Approx. 800-1,000 sq. ft.	Reception, registration, waiting, visitor orientation, access control and facility introduction.
Utility / Support Areas	As required	Stores, tool rooms, server/IT room, electrical rooms, staff areas, safety equipment, PPE, first-aid and maintenance access.

5.1 Design Philosophy

- Modular architecture that permits phased implementation and future reconfiguration.
- Flexible lab configurations with safe separation between clean, digital, electronic, mechanical, dust-generating, heat-generating and visitor-facing areas.
- Universal accessibility and inclusive circulation.
- Sustainability-led interior design, including energy-efficient lighting, occupancy sensors and efficient HVAC design.
- Smart building principles including readiness for BMS integration, IoT sensors and energy monitoring.
- Future expansion capability for additional equipment, compute infrastructure and programs.
- Clear visitor journey with controlled visibility into high-value labs without compromising safety or confidentiality.
- Operational practicality for staff, equipment operators, maintenance personnel and training cohorts.

5.2 AI and Emerging Technology Zone Requirements

- Workspace capacity for approximately 100-150 users through an appropriate mix of hot desks, fixed workstations and startup pods.
- Conference facilities including one 20-person board room, two 10-person meeting rooms and one 50-person training room, subject to final space optimization.
- Provisioning for AI servers/GPU clusters, AI model training, edge AI deployment and AI sandbox activities.
- Network design readiness for 10/40/100 Gbps backbone, fiber-ready architecture and secure VLAN segmentation.
- Server room or compute room planning with provisions for racks, cooling, power redundancy, access control, monitoring and maintainability.
- Cybersecurity readiness through identity management, access control, zero-trust-ready network zoning, SIEM-readiness and SOC-integration readiness, as infrastructure provisions and not as software implementation scope.

5.3 Experience Centre Requirements

- Interactive technology wall with provision for a minimum 8m LED video wall or equivalent display solution.
- Startup gallery, innovation showcase, AP innovation story, investor presentation zone and demo area.
- AR/VR/MR demonstration area, mixed reality experiences and digital twin demonstration capability.
- Visitor circulation for 100+ visitors with appropriate safety, crowd management, acoustics, lighting and AV planning.
- Hybrid event broadcasting, projection mapping readiness, large format display and 4K/interactive display provisions where appropriate.

5.4 Advanced Prototyping Lab Requirements

- Digital fabrication provisions for industrial FDM printers, SLA printers, SLS printers, laser cutters and CNC machines, subject to floor feasibility and equipment rationalization.
- Mechanical workshop provisions for milling machines, lathes, welding stations and sheet metal tools, subject to structural, fire, ventilation and safety feasibility on the 6th floor.
- Electronics lab provisions for PCB design, PCB assembly, embedded systems and sensor development.
- Robotics zone provisions for robot assembly, robot testing and industrial automation systems.
- Utility planning for power, UPS, compressed air, exhaust, dust collection, fume extraction, ESD-safe zones, tool storage and material storage.
- Clear safety boundaries, machine access, operator zones, visitor-safe viewing routes and emergency shutdown systems.

5.5 Makerspace Requirements

- Open workbenches with modular furniture and reconfigurable layouts.
- Rapid prototyping tools, IoT development stations and electronics tinkering areas.
- Simultaneous occupancy planning for approximately 75-100 users.
- Safe storage for tools, consumables, prototypes and user materials.
- Clear separation from high-risk machinery while maintaining a strong maker-community feel.

5.6 Testing and Validation Requirements

- Robotics testing arena of approximately 1,500 sq. ft., subject to layout optimization.
- Drone testing cage of approximately 1,000 sq. ft. with safety netting, flight tracking provisions and operating safety controls, subject to statutory/building feasibility.
- Product testing area with provisions for environmental testing and functional validation.
- AR/VR/XR lab with motion tracking and XR development system readiness.
- Appropriate acoustic, vibration, safety, visibility and utility planning for test areas.

5.7 Smart Infrastructure, ICT, AV, Sustainability and Safety

- BMS readiness for HVAC, lighting, security and energy monitoring integration.
- IoT layer readiness with sensors for occupancy, temperature, energy usage and equipment monitoring.
- Dual ISP connectivity, redundant fiber backbone, enterprise-grade Wi-Fi and structured cabling.
- Server room planning for AI servers, edge computing and storage systems, with provisions for 15-20 racks where feasible.
- Training room AV infrastructure including 4K displays, interactive boards and video conferencing.
- Sustainability measures aligned to IGBC Gold or equivalent intent, to the extent feasible for interiors and leased floor conditions.

- Compliance planning for National Building Code, fire NOC requirements, electrical safety standards and relevant lab safety practices.
- Lab-specific provisions such as fume extraction, dust collection, emergency shutdown systems, chemical storage compliance where applicable, PPE points and first-aid readiness.

6. Scope of Services

The selected consultant shall provide end-to-end design consultancy services for the proposed facility. The scope shall include, but not be limited to, the following:

6.1 Inception and Requirement Validation

- Review all documents supplied by RTIH, including floor CAD drawings, requirement note, broad equipment list and reference project documents.
- Conduct site visit and stakeholder discussions with RTIH leadership, program owner, lab/technical team, admin team and internal PMC team.
- Validate user groups, occupancy assumptions, operational workflows, visitor journeys, safety requirements and phasing needs.
- Prepare an Inception Report capturing assumptions, constraints, risks, information gaps and design approach.

6.2 Master Planning and Concept Design

- Prepare at least two concept zoning options for the full 41,694 sq. ft. area.
- Recommend final space allocation and functional adjacency plan based on safety, workflow, access, visitor experience and equipment feasibility.
- Prepare circulation plans for users, staff, visitors, material movement, equipment movement, emergency evacuation and maintenance access.
- Prepare preliminary concept visuals/mood boards and material palette consistent with RTIH branding and the intended innovation facility character.

6.3 Detailed Interior and Lab Design

- Prepare detailed architectural and interior layouts.
- Prepare lab-wise plans, furniture layouts, machine/equipment placement, workbench layout and storage layout.
- Prepare reflected ceiling plans, flooring plans, wall finishes, partitions, doors, access controls, signage and wayfinding inputs.
- Prepare 3D views/rendered visuals for key areas including reception, experience centre, makerspace, advanced prototyping lab, AI/technology zone and training areas.
- Prepare coordinated drawings suitable for tendering the subsequent build/interior execution package.

6.4 MEP, ICT, AV, Fire and Safety Planning

- Electrical load assessment and room-wise/equipment-wise power requirement plan.
- UPS, backup power and dedicated circuit planning where required.
- HVAC zoning and ventilation design inputs, including heat-load considerations for compute/server rooms and equipment zones.
- Fume extraction, dust collection, compressed air, exhaust, drainage and special utility planning where applicable.
- Fire alarm, fire suppression, emergency lighting, evacuation, exit signage and safety equipment planning.
- Structured cabling, Wi-Fi, fiber backbone, server room, rack layout, access control and CCTV design inputs.

- AV system design inputs for training rooms, board room, meeting rooms, experience centre and hybrid event broadcasting.

6.5 Structural and Feasibility Review

- Review the suitability of the 6th floor for proposed equipment, machine loads, dynamic loads, vibration and utility routing.
- Identify equipment/functions requiring structural review, vibration isolation, special foundations, relocation or alternative solutions.
- Prepare a structural load and vibration feasibility note based on available structural/building information and site assessment.
- Coordinate with RTIH/building owner/structural consultant, as required, for feasibility inputs. Final structural certification, if required by statutory authorities or building owner, shall be separately obtained unless included by the bidder in its proposal.

6.6 Equipment Review and Rationalization

- Review RTIH's broad equipment list and map it to functional zones.
- Recommend additions, deletions, substitutions, phasing and shared-use models based on demand, safety, cost, floor feasibility and maintainability.
- Prepare equipment placement plan with power, HVAC, exhaust, safety clearance and access requirements.
- Identify equipment that may not be feasible on the 6th floor and recommend practical alternatives.

6.7 BOQ, Cost Estimate and Tender Support

- Prepare detailed BOQ and cost estimate for interior implementation within the INR 4 Crore budget cap.
- Prepare technical specifications and drawings for the subsequent build/interior works RFP.
- Provide value-engineering options and phasing plan if the desired scope exceeds the available implementation budget.
- Support RTIH with technical clarifications during the build/interior RFP pre-bid stage. This support shall not constitute PMC or day-to-day site supervision.

7. Deliverables

Stage	Deliverables
Stage 1 - Inception	Inception Report; site assessment note; stakeholder requirement validation; risk and information gap register; initial area program.
Stage 2 - Concept Design	Minimum two zoning options; recommended concept; adjacency matrix; user/material/visitor circulation plans; initial 3D mood board; preliminary budget check.
Stage 3 - Final Layout and Visualization	Final 2D layout; lab-wise equipment placement; furniture layout; reception/experience centre/AI zone/makerspace/prototyping lab concepts; key 3D views.
Stage 4 - Detailed Design Package	Architectural/interior drawings; RCP; flooring; partitions; finishes; furniture; signage; MEP drawings; electrical load plan; HVAC/ventilation plan; fire/safety plan; ICT/network/AV plans; structural feasibility note.
Stage 5 - Tender-Ready Package	BOQ; cost estimate; technical specifications; tender drawings; implementation phasing; value-engineering options; editable files and final PDF package.

All final deliverables shall be submitted in editable and non-editable formats as applicable, including DOCX/XLSX/PDF/DWG and BIM/Revit/IFC or equivalent coordinated model files wherever BIM deliverables are proposed. All drawings shall also be submitted in print-ready PDF format.

8. Timelines and Payment Milestones

The selected consultant shall complete the assignment within approximately eight weeks from the date of work order/signing of agreement, unless extended by RTIH in writing.

Milestone	Indicative Timeline from Work Order	Payment
Inception Report and requirement validation	T + 1 week	15%
Concept design and zoning options	T + 2 weeks	20%
Final layout, equipment placement and key 3D views	T + 4 weeks	25%
Detailed design package including MEP/fire/HVAC/ICT/AV inputs and BOQ	T + 6 weeks	25%
Tender-ready package and handover	T + 8 weeks	15%

Payment shall be released only after satisfactory acceptance of the corresponding deliverable by RTIH. Taxes shall be paid as applicable, subject to submission of valid tax invoice.

9. Eligibility Criteria

Bidders must meet the following minimum eligibility criteria. RTIH may seek documentary evidence at any stage.

S No	Eligibility Requirement	Documents to be Submitted
1	The bidder shall be a registered legal entity/ firm/ LLP/ company/ proprietorship engaged in architecture, interior design, engineering design, lab planning or allied design consulting services.	Certificate of incorporation/registration, PAN, GST registration, firm profile.
2	The bidder shall have prior experience in design of laboratories, prototyping facilities, maker spaces, fab labs, R&D centres, testing labs, technical training labs, engineering workshops, Centres of Excellence or similar technical facilities.	Work orders/completion certificates/client letters/project sheets.
3	The bidder shall have completed at least two relevant design assignments in the last seven years. Preference will be given to assignments involving lab planning, technical facilities, prototyping, electronics, AI/digital infrastructure or innovation centres.	Project credentials with scope, area, client, year and deliverables.
4	The proposed team shall include an architect/interior designer, MEP consultant, fire and safety consultant, structural consultant/ review expert, lab planner/ technical facility planner, and at least one specialist with prototyping/fab lab design or operations experience.	Team structure, CVs, role allocation and availability commitment.
5	The bidder shall not have been blacklisted/debarred by any government authority, PSU, statutory body or reputed institutional client.	Self-declaration.
6	The bidder shall execute the NDA prescribed by RTIH prior to receiving detailed CAD drawings, equipment list and confidential project documents.	Signed NDA.

Consortium/JV is not preferred for this assignment. However, the principal bidder may propose specialist sub-consultants for MEP, structural, fire safety, ICT, AV, sustainability, BIM or fab lab/prototyping expertise. The principal bidder shall remain fully responsible for all deliverables.

Prior government or CSR project experience is not mandatory. It may be considered only as contextual strength where relevant, and shall not substitute for lab/facility design capability.

10. Proposal Submission Requirements

Bidders shall submit proposals in two separate covers/envelopes or separate password-protected files, as instructed by RTIH:

10.1 Cover A - Technical Proposal

- Covering letter.
- Signed and stamped RFP acceptance letter.
- Signed NDA.
- Bidder profile and legal documents.
- Relevant project credentials.
- Understanding of assignment and design approach.
- Methodology and work plan.
- Team composition and CVs.
- Proposed deliverables schedule.
- Comments/assumptions, if any, clearly listed.
- Self-declaration on non-blacklisting and conflict of interest.

10.2 Cover B - Financial Proposal

- Lump-sum design consultancy fee in INR.
- Taxes to be shown separately.
- The quote shall include all professional fees, site visits, meetings, presentations, revisions, documentation, printing/soft copies and support specified in this RFP, unless explicitly excluded.
- Any reimbursables, if proposed, must be clearly specified. RTIH reserves the right to reject conditional or unclear financial proposals.

10.3 Indicative RFP Calendar

Activity	Indicative Timeline
RFP issue	Day 0
Last date for submission of NDA for release of detailed documents	Day 3
Pre-bid meeting and site visit	Day 5-7
Last date for written queries	Day 8
RTIH response to queries/addendum, if any	Day 10
Proposal submission deadline	Day 14
Technical presentations	Day 17-18
Financial bid opening and selection	By Day 21, subject to approvals

11. Evaluation Methodology

RTIH shall evaluate proposals using a Quality and Cost Based Selection (QCBS) approach. Technical proposals shall carry 90 marks and the financial proposal shall carry 10 marks. Financial bids shall be opened only for bidders who meet eligibility requirements and secure the minimum qualifying technical score.

Criteria	Marks	Indicative Considerations
Relevant experience in lab/prototyping/technical facility design	25	Similar projects, technical depth, scale, relevance, completion status and quality of submitted credentials.
Understanding of RTIH requirement and proposed facility concept	20	Clarity of approach to 6th floor constraints, integrated facility planning, user journey, lab safety, equipment feasibility and budget sensitivity.
Methodology, work plan and deliverables	20	Design process, stakeholder engagement, phasing, cost control, tender-readiness, coordination and risk management.
Team composition and domain expertise	15	Architectural/interior, MEP, fire safety, structural, lab planning, ICT/AV and prototyping/fab lab expertise.
Presentation / concept approach	10	Quality of presentation, design thinking, practical feasibility, innovation, responsiveness to RTIH questions.
Financial quote	10	Lowest evaluated financial quote gets 10 marks; other bidders scored proportionately.

Minimum technical qualifying score: 70 out of 90. The financial score shall be calculated as: Financial Score = (Lowest Financial Quote / Bidder Financial Quote) x 10. Final Score = Technical Score + Financial Score. RTIH reserves the right to negotiate with the highest-ranked bidder in accordance with applicable internal processes.

12. Commercial Terms

- The bidder shall quote a lump-sum design consultancy fee for the full scope of services.
- The fee shall be inclusive of all professional charges, meetings, site visits, presentations, coordination, revisions and deliverables required under this RFP.
- GST/taxes shall be indicated separately.
- Payment shall be milestone-linked as specified in this RFP and subject to RTIH acceptance of deliverables.
- No advance payment shall be assumed unless expressly agreed by RTIH.
- The selected consultant shall enter into a professional services agreement/work order with RTIH before commencement of work.
- All drawings, models, BOQ, specifications, reports and related deliverables prepared under this assignment shall become the property of RTIH upon payment of applicable fees.
- The selected consultant shall maintain confidentiality of all information shared by RTIH and shall not use the project as a public credential without prior written approval of RTIH.

13. General Terms and Conditions

13.1 Confidentiality and NDA

Detailed CAD drawings, equipment lists, internal budgets, project documents, discussions and site information shall be treated as confidential. Bidders must execute the NDA prescribed in Annexure 6 prior to receiving detailed documents or participating in detailed site-level discussions.

13.2 Conflict of Interest

Bidders shall disclose any actual or potential conflict of interest. The selected design consultant and its affiliates shall not participate in the subsequent build/interior execution tender or equipment procurement tender unless specifically permitted by RTIH with appropriate safeguards and disclosures.

13.3 Right to Accept or Reject

RTIH reserves the right to accept or reject any or all proposals, cancel the RFP, modify the scope, seek clarifications, negotiate, issue corrigenda or annul the process at any stage without assigning reasons and without incurring liability to any bidder.

13.4 No Obligation to Award

Issue of this RFP does not create any obligation on RTIH to award the assignment. Bidders shall bear all costs associated with preparation and submission of proposals, participation in meetings and presentations, and site visits.

13.5 Accuracy of Information

Information provided in this RFP is based on current understanding and reference documents. Bidders are expected to conduct their own assessment. The selected consultant shall validate site conditions, measurements and assumptions before finalizing design deliverables.

13.6 Revisions

The quoted fee shall include reasonable revisions required for RTIH review and approval at each stage. Major scope changes outside this RFP may be addressed separately by mutual agreement.

13.7 Applicable Law and Jurisdiction

The process and resulting engagement shall be governed by the laws of India. Dispute resolution and jurisdiction shall be as specified in the agreement/work order executed with the selected consultant.

14. Annexures

Annexure 1 - Bidder Profile Format

Field	Details to be Filled by Bidder
Name of Bidder	
Legal Status	
Registered Address	
Contact Person	
Phone and Email	
PAN	
GSTIN	
Year of Establishment	
Core Services	
Total Employees / Professionals	
Details of Specialist Sub-consultants, if any	

Annexure 2 - Relevant Project Experience Format

S. No.	Client / Project	Year	Area / Scale	Scope Performed	Relevance to this RFP
1					
2					
3					

Annexure 3 - Proposed Team Format

S. No.	Name	Role	Qualification	Relevant Experience	Time Commitment
1		Project Lead / Architect			
2		Lab Planner / Technical Facility Planner			
3		Prototyping / Fab Lab Specialist			
4		MEP Consultant			
5		Fire and Safety Consultant			

S. No.	Name	Role	Qualification	Relevant Experience	Time Commitment
6		Structural Consultant / Review Expert			
7		ICT / AV / BMS Specialist			

Annexure 4 - Technical Proposal Checklist

S. No.	Document / Information	Submitted (Yes/No)
1	Covering letter	
2	Signed RFP acceptance	
3	Signed NDA	
4	Bidder profile and legal documents	
5	Relevant project credentials	
6	Design approach and methodology	
7	Work plan and timelines	
8	Team CVs and role allocation	
9	Non-blacklisting declaration	
10	Conflict of interest declaration	

Annexure 5 - Financial Proposal Format

To be submitted separately in Cover B / Financial Proposal. The financial proposal shall not be included in the technical proposal.

Component	Amount in INR
Lump-sum design consultancy fee for full scope of services	
GST / taxes, if applicable	
Total amount including taxes	
Any proposed reimbursables, if any (clearly specify)	

Declaration: We confirm that the above quote is inclusive of all services, deliverables, meetings, site visits, revisions and support specified in the RFP, except exclusions expressly stated above.

Authorized Signatory: _____ Date: _____

Annexure 6 - Non-Disclosure Agreement Format

This Non-Disclosure Agreement ("NDA") is executed on this [●] day of [●], 2026 by and between Ratan Tata Innovation Hub Amaravati Foundation ("RTIH") and [Name of Bidder] ("Recipient").

RTIH may disclose to the Recipient certain confidential information including CAD drawings, floor plans, equipment lists, budgets, internal notes, technical requirements, project documents, discussions and site-related information for the limited purpose of enabling the Recipient to participate in the RFP process for design consultancy of the proposed facility.

The Recipient shall keep all Confidential Information strictly confidential and shall use it only for the RFP process and, if selected, for performance of the assignment.

The Recipient shall not disclose Confidential Information to any third party except to its employees, consultants or advisors who need to know such information for the permitted purpose and who are bound by confidentiality obligations no less stringent than this NDA.

The Recipient shall not copy, reproduce, publish, circulate, commercially exploit or use the Confidential Information for any purpose other than the permitted purpose.

The Recipient shall implement reasonable safeguards to protect the Confidential Information from unauthorized access, use or disclosure.

Upon RTIH's request, the Recipient shall return or destroy all Confidential Information and certify such return/destruction, except archival copies required to be retained under law.

The obligations under this NDA shall survive for a period of five years from the date of disclosure, or longer where the information continues to qualify as sensitive security information or confidential business information.

The Recipient shall not make any public announcement, press release, social media post or client credential reference regarding the project without prior written approval of RTIH.

Any breach of this NDA may cause irreparable harm to RTIH and RTIH shall be entitled to seek injunctive relief, damages and other remedies available under law.

For RTIH: _____

For Recipient: _____

Name/Designation: _____

Name/Designation: _____

Date: _____

Date: _____

Annexure 7 - Indicative Documents to be Shared by RTIH After NDA

- CAD drawings of the 6th floor at Mayuri Tech Park.
- Broad equipment list and available equipment data sheets.
- Program owner requirement note for the proposed facility.
- Reference documents relating to prototyping, testing, AI/technology zones and facility planning.
- Branding and visual identity inputs, if required.
- Any other site/building information available with RTIH.

Annexure 8 - Deviation Statement

Bidders shall list all deviations, assumptions and exclusions clearly. If no deviation is stated, the proposal shall be deemed to be fully compliant with the RFP.

S. No.	RFP Clause	Deviation / Assumption / Exclusion	Impact on Scope / Cost / Timeline
